OFFICE OF THE INTELLIGENCE OFFICER
STATION 128 - APO 557
U. S. ARMY

12 May 1944.

SUBJECT: Comments of Crews participating in Mission to MERSEBURG, GERMANY.

TO : COMMANDING OFFICER, 401st Bombardment Group (H), APO 557, U. S. Army.
(Thru Lt. Col. B. K. Voorhees and Lt. Col. A. C. Brooks).

1. Captain Alvah H. Chapman Jr. (Pilot) A/C 2012, stated that on assembly spares of Lead Box trailed the Lead Box below and interfered with forming of Low Box. Spares should fly high on High Squadron of Lead Box in order not to interfere with Low Box assembly.

2. Captain Fred D. Grinham (Pilot) A/C 9904, asked why Box Leaders cannot get together on Air Speed. Lt. Edward C. O'Neil (Pilot) A/C 1005, also commented that Air Speed was too slow - almost stalled out.

3. Eight crews objected to the breakfast served this morning. Food was greasy and gas forming and milk for coffee was sour according to some crew members.

4. Lt. Enver C. Gury (Bombardier) A/C 1750, suggests crossing enemy coast at point other than Ostend.

5. Cpl. Roy V. Cohen (RO) A/C 7151, would like to have new American type helmet. Cuts out noise and aids hearing.

6. Sgt. Franklin C. Cohen (LWG) A/C 2012, states that chaff is discharged much better when radio door is kept closed.

7. Crews of Lt. William P. Prots (Pilot) A/C 2580, and Lt. Clifford A. Lincoln (Pilot) A/C 2780, stated that they only had one Flak helmet for entire crew.

8. Lt. Clifford A. Lincoln (Pilot) A/C 2780, heard someone on VHF fighter channel giving time they would be at IP, using term "IP" rather than code word.

9. Several of the crews are critical of the fact that whiskey has not been served lately on return from missions.

/s/ Lt. Paul R. Myers
W. B. PRY,
Major, Air Corps,
Group S-2 Officer.

12 May, 1944

SUBJECT: Mission Summary Report.

TO : Group Operations, Station 128, APO 557.

1. Abortives.

- a. Airplane No. 42-107113 - Returned early with crew members sick.
- b. Airplane No. 42-107092 - Returned early with crew members sick.
- c. Airplane No. 42-3507 - Returned early with crew members sick.
- d. Airplane No. 42-39873 - Returned early because of material failure of fitting in the pressure line to the prop feathering pump on # 4 engine. This was a 90c fitting which failed on a seam in the metal.
- e. Airplane No. 42-31034 - Returned early because of self inflicted battle damage. This airplane has a radio hatch modified in accordance with T.M.I. 01-20E-28. Vibration caused by firing this gun had caused the opening for the hatch to become enlarged, allowing the hatch and the gun to fall out, shooting out part of the control cables.

2. Battle Damage.

- a. 42-97487 - Flak hole in right wing at station 30 fore; 20mm hole through vertical stabilizer and right elevator; Flak hole above # 3 gas tank mid-way.
- b. 42-38026 - Flak hole in left side of fuselage at station 6j; 20mm hole through left horizontal stabilizer from front to rear at station 130; Nose of rocket hung in left wing at station 27; Flak hole in leading edge of wing between fuselage and # 3 engine.
- c. 42-107039 - Flak hole through nose section and out through top in front of pilot; Flak hole in left side of fuselage at station 3.
- d. 42-31069 - Several flak holes in right wing and horizontal stabilizers; Small flak hole in left side of fuselage, in front of leading edge of stabilizer; Small flak hole in left side of fuselage, beneath Navigator's window; Flak hole in top of # 1 nacelle.
- e. 42-31983 - Large flak hole in leading edge of left wing, damaging gusset plate and braces.
- f. 42-39904 - Large rip in bottom of left wing, near tip; caused by flak; Small flak hole in bottom of left wing, at leading edge; Small flak hole in left side of fuselage, near station 4.

SUBJECT: Mission Summary Report (continued)

g. 42-37843 - Several flak holes in wings and ailerons, puncturing # 4 fuel tank; Three flak holes in horizontal stabilizers; Flak hole in plex-glass nose; Small flak hole in left side of Chin Turret.

h. 42-107009 - Numerous flak holes through skin from station 6 to 8 both sides of fuselage; Large flak tear base left side of vertical stabilizer, structural damage; Five flak holes in upper right wing, skin and corrugation; Three flak holes in upper left wing, skin damage only; Four flak holes through skin and fabric right horizontal stabilizer and elevator; Flak hole through skin of left horizontal stabilizer; Flak through wing between # 2 engine and fuselage puncturing # 2 main tank, flak hit on # 1 rocker box cap # 3 engine.

i. 42-32005 - Flak through left wing outboard, hitting fuel tank.

j. 42-31932 - 3" flak tear in skin lower station 2; Flak hole through skin and corrugation left wing at leading edge;

k. 42-31557 - Flak through left wing and flap skin and structural damage; Flak through left wing and flap, cutting aileron control cables, rear spar and outboard tokio tank; Flak through right outboard wing hitting tokio tank.

l. 42-31072 - Flak hole through trailing edge of right wing, and flap, skin and structural damage; Flak through left hand dinghy door skin only; Flak through vertical fin, skin only;

m. 42-97395 - 3" flak hole in skin left side at station 6d; Fabric tear in rudder; 1" flak hole in right wing leading edge, outboard; 3" flak hole trailing edge of left wing and flap skin and structural damage.

n. 42-97440-2" Flak hole in left horizontal stabilizer nicking front spar; 8" skin tear left lower wing tip; Skin tear lower left wing outboard of # 1 engine; 1" flak hole in corrugation lower left wing aft of # 2 engine; 3" flak hole # 4 engine accessory section cutting oil and gas lines; 2" flak hole in fuselage, cutting stiffeners at station 6, left side; 3" flak hole in upper left wing outboard # 1 engine puncturing tokio tank.

o. 42-107210 - 2" flak hole in fuselage between station 5 and 6A left side, cutting circumferential stiffener; 3" flak hole through left horizontal stabilizer cutting stringers and rear main spar; 2" flak tear in skin on trailing edge of right wing outboard # 1 engine.

p. 42-31315 - Flak hit # 7 cylinder, # 1 engine, engine change necessary; 2" flak hole through left elevator cutting rib; 1" flak hole through left wing between # 2 engine and fuselage, main tank change; 1" flak tear in rudder.

q. 42-107151 - 3" flak hole through skin and corrugation lower right wing, outboard.

r. 42-31863 - 3" skin tear leading edge of right horizontal stabilizer caused by flak; 3" tear in left aileron hitting rib; 2" flak hole in # 2 oil cooler caused by flak.

s. 42-97478 - Flak hole in # 2 crankcase; 1" flak hole in right hand battery; 3" skin hole in leading edge of left wing, outboard.

SUBJECT: Armament Narrative on Mission 12 May, 1944
TO : Commanding Officer, 401st Bombardment Group (H),
APO 557, U.S. Army.

1. Negative Armament malfunction report is submitted for the mission of 12 May, 1944.

BOMB RACK MALFUNCTIONS

- a. A/C # 42-97780 - Bomb Bay Doors would not close electrically due to limit switch.
- b. A/C # 42-31496 - Bomb Bay Motor burned out.
- c. A/C # 42-107210 - Bomb Bay Doors would not close in full due to defective limit switch.
- d. A/C # 42-107207 - Bomb Bay Doors would not close in full due to defective limit switch.

Four (4) airplanes equipped with the all electric bomb release system on to-days mission.

(1 : 32,000) approx.

Issued March 1944

A.1.3c(1)

TYPE A

Illustration No.
I (a) (iii) 15/13

BRIEFING NOTES

The target is the synthetic oil plant and ammonia and nitrogen works of the I.G.Farbenindustrie, located three miles south of the center of the city and 20 miles west of Leipzig. It lies on the east side of a railway line with the River Saale flowing N.W. about a mile to the East.

The plant is one of the most extensive works in Germany. It is the largest ammonia producer in Europe and produces a third of Germany's supply. Ammonia is used in the manufacture of nitric acid and explosives. Other allied products are also manufactured.

The total target area is about 4,000 by 1,200 yards roughly rectangular in shape with the major axis lying in a north-south direction. The area is compactly built.

The target area is surrounded by balloon defences.

The most prominent landmarks are the workings and slag heaps of the brown coal mines to the west.

Your particular MPI is a gas generating plant

Bombing altitude is 25,000

Secondary target is the aero engine factory in Eisenach. The works are in the built-up area in the northern part of the town covering an area nearly half a mile in length.

PFF ONLY secondary is the large railroad marshalling yards at Halle. These have a capacity of 4500 wagons in 24 hours.

Last Resort---Any military objective in Germany or any airdrome, not adjacent to a built up area, in the occupied countries.

No convoys expected.

NOTE - The MPI's on these targets are placed on or between several buildings containing Winkler generators or gas containers. The generators are *halfway down in buildings* 70 or 80 feet high and a direct hit is necessary to destroy them. This particular equipment is probably the most important of the plant and destruction will probably cause less of production for at least six months.

IP is in the center of triangle formed by Eisenburg, Zeitz and Gera.

Route from IP to Target is parallel to railway and River. Target is just beyond triangle formed by double track railroads.

We are in the 94th "A" Combat Wing. This Wing will lead the Division.

1:500,000 map showing route
Photo of Primary 1:32,000
Night Target Map
Geerlings perspective
Flak map

P.W. Procedure - *Frome - avoid allsee*

Empty your pockets.

Check fit of parachute harness

Do tags and GI shoes

Carry escape kit and purse inside your shirt

Don't mention target---cite Berlin example

Third Division in first. Will hit Brux and Zwickau -- *Synthetic Oil and Aircraft factory*
Other combat wings of 1st Division will hit our target and other synthetic oil installations at Lutzkendorf (Near Halle)
Second Division, last in, will hit Zeitz and Behlen - Synthetic Oil

Fighter Support--

1 Group P-47

1 Group P-51

1 Group P-51

1 Group P-51

1 Group P-38

1 Group P-38s will arrive late to escort stragglers

Fighter support in the target areas will be so divided that cover will be furnished to all Combat Wings attacking the respective targets.

In Flak area 4 minutes

STATION WEATHER OFFICE
AAF STATION 128
APO 557

12 May 1944

WEATHER INTERROGATION SUMMARY FOR MISSION OF 12 MAY 1944

BASE AT TAFHUFF: (084) Nil low cloud, trace altostratus, and nil high cloud. Visibility 4 miles in base.

ROUTE OUT: Trace altostratus over England. Trace altostratus over continent in vicinity of target. Nil to 1/10 cirrus over England becoming 3-5/10 cirrus at 25000 ft. over continent. Visibility restricted by haze.

TARGET: (1350) 1/10 altostratus at 12000 ft. 3-5/10 cirrus at 20000 ft. Visibility restricted by haze.

ROUTE BACK: Similar to route out except 1-2/10 cirrus over England near base.

BASE ON RETURN: (1630) 2/10 cirrus, base 4000 ft. Nil middle and 4/10 cirrus at 25000 ft. Visibility 6 miles. Vertical visibility restricted by haze aloft.

REMARKS: Temperatures forecast were good. Winds were more easterly and stronger than forecast over continent (5 deg. East to target at 19000 ft. --- 070 Degree at 40 knots). Light persistent contrails by fighters at 30000 ft. and above.
