## 401ST BOMBARDMENT GROUP (H)

R E P O R T O F O P E R A T I O N A LD A YMISSION SUMMARY REPORTMISSION # 160Date 25 October 1944ASSIGNMENT

1. Assigned Target: HAMBURG, GERMANY
2. Commitments: The 401st Group furnished three 12 A/C squadrons comprising the 94th "A" Group. One PFF A/C was included in each squadron's formation, and a spare A/C accompanied the lead and low squadrons.

EXECUTION

1. Target Bombed: HAMBURG, GERMANY (PFF)
  2. a. Group Leader: Capt. F. A. KALINSKI (Charleville)  
Lead Navigator: 1st Lt. R. F. RUSSELL (Chaffey-"Mickey")  
Extra Navigator: 1st Lt. H. D. FISHBECK  
Lead Bombardier: 1st Lt. C. H. MINOTT
  - B. Low Sqdn Leader: Capt. W. S. HARB (Carroll)  
Lead Navigator: 1st Lt. P. F. KAISER (Dresback-"Mickey")  
Lead Bombardier: Capt. W. T. HUTSON
  - c. High Sqdn Leader: 1st Lt. B. F. CARNS  
Lead Navigator: 1st Lt. D. B. LIGON (Howard-"Mickey")  
Lead Bombardier: 1st Lt. M. J. WEIGLER
3. Flight Over England:
  - a. Takeoff: Normal takeoff was made without incident, three complete squadrons plus two spares taking off.
  - b. Sqdn & Gp Assemblies: Sqdn and Group assemblies were made almost as briefed on the Cottesmore buncher. Cottesmore was departed north of course a little late.

MISSION SUMMARY REPORT (Cont)

3. Flight Over Target: (Cont)

c. Route Over England:

En route over England visual contact was made with 94th "B" and "C" wings which fell in trail, in proper position. At Control Point # 1 Division assembly was made, visual contact being made with the six preceding groups. We took over # 7 in Division column as briefed.

4. Attack:

a. Flight to Target:

Our position in Division formation was #7 as briefed. We maintained this position on the flight to the target. Prior to the IP turn we were forced to follow a 1st Wing Group (Red vertical) which went off course to the left and then to the right. This same group made a sweeping turn on to the IP and went away off to the left of the target. We continued in on course from the IP. Just prior to "Bombs away", the aforementioned Group cut across our front giving us considerable propwash. This would have interfered considerably more had it been a visual run.

b. Bombing Run:

**Lead Squadron:** The cloud cover was 10/10ths so bombing was done by PFF. We were the 7th Squadron to go into the target and were almost cut off by another squadron which just missed us at our release point. Prop wash was rough to very rough. The run was made by the Mickey Operator on a Mag-Heading of 18°. Course was good. The tangent was taken from the ABC and refined with the air of the Mickey Man. The tangent used for bombing was .53; the drift was 7R. Bombs were salvoed by the Lead and dropped with a 140 intervalometer setting by the togeleers. The AFCE was in good order. Results were cloudy.

**Low Squadron:** As the formation came in over enemy coast the cloud cover was 10/10ths. The weather ship said target was covered and bombing would be done by PFF. We came over briefed IP and Mickey Operator took over for an individual wquadron run, and our bombs were away just beyond the smoke marker of the lead squadron. The lead salvoed; the balance of the formation used 140 ' intervalometer setting. AFCE was okay. Results were unobserved.

**High Squadron:** Due to 10/10ths cloud cover the Air Commander announced PFF bombing. Before the IP the pilot kept to the right to allow proper spacing between squadrons. During the bomb run the Mickey Operator killed course and called off rate check points for a squadron run. The lead and low squadrons were constantly to the left of the high and dropped bombs sooner and turned out of the target area before the high squadron. The bombardier salvoed with electric release when the indices met and followed this with the mechanical salvo. All others dropped with a 140' intervalometer setting. AFCE was okay. Smoke was rising through the clouds below and ahead at bombs away and sky markers were visible all around our release point. Results were unobserved.

MISSION SUMMARY REPORT (Cont)4. Attack: (cont)

c. Flight From Target: Flight from the target was as briefed except for the high squadron which was forced to return with another group after having been cut off at the target by the 1st Wing Group which cut across over our line of attack. Letdown was made over the North Sea and the return was mainly as briefed.

d. Return to Base: On return to the base flight we made one 360° turn to let down underneath the overcast. Normal landing was made, and all ships landed safely at home base.

e. Weather: Weather was described as 10/10ths undercast consisting of low cumulus clouds with tops at 8-10,000' altitude, this condition prevailing over channel, continent and target area.

f. Fighter Support: Fighter support was described as excellent, present through the entire mission.

g. Comments on Formation: Formation was good throughout the mission. The 94th "A" Group was one minute and three miles behind the preceding groups. The low squadron was about 200' lower than briefed because of 3 A/C in the lead sqd.

h. Conclusions and Recommendations: There is some question in the Leader's mind as to whether all groups flew at their briefed altitudes; everyone seemed to be at 27,000'. The 1st Wing Group ahead of us was supposed to be at 25,500' but was actually at 27,000'. The staggering of altitude for following Groups is excellent, if adhered to.

5. Aircraft Not Attacking:

High Squadron: A/C 42-31891 - Not Sortie. Returned early after rubber collar on induction system slipped off at 20,000'. All supercharger boost was lost on engine and aircraft could not maintain its position in formation and climb the remaining altitude. (Mech)

6. Enemy Opposition: No air opposition seen or encountered.  
(for flak see Flak Report)7. Battle Damage:

| <u>Major</u> | <u>Minor</u> | <u>To Flak</u> |
|--------------|--------------|----------------|
| 1            | 6            | 87             |

8. Casualties: None.9. Statistical Summary of Operations: (See attached form)

MISSION SUMMARY REPORT (concl)10. Bombing Data:

a. Observations: All the bombfalls were unobserved due to complete undercast. Each of the squadron's bombfalls hit in the same general area and crews report a column of black smoke billowing through clouds as high as 10,000' when they left the target area.

b. Disposition of Bombs:

Lead Squadron: All the 12 A/C E.E.T. attacked the target dropping 69 x 500# M17 and 69 x 500# M64. One A/C had 3 IB's and 2 GP's hang up and hence jettisoned them in the channel. The spare A/C returned 6 IB's and 6 GP's.

Low Squadron: All the 12 A/C E.E.T. attacked the target dropping 72 IB's and 71 GP's. The spare A/C returned 6 IB'S and 6 GP's to base.

High Squadron: One spare failed to take off hence only 12 A/C were airborne. 11 A/C E.E.T. and attacked the target with 66 IB's and 65 GP's. Aborting A/C 891 jettisoned 6 IB's and 6 GP's in channel.

SUBJECT: Crew Comments and Suggestions.

TO : Commanding Officer, Station 128, APO 667, U.S. Army. (thru  
M. Col. Seawell.)

1. Capt. Wallace S. Barb, co-pilot a/c 8033, reports that, although 90 per cent of chaff discharged over target dispersed effectively, 10 per cent remained in a wadded condition even though paper cover came off properly.

2. Lt. Bernhardt F. Burns, pilot a/c 7947, and Capt. Ted Carroll, pilot a/c 8033, state that the combination of a solid low undercast and quantities of chaff discharged over target effectively disrupted anti aircraft fire put up by the enemy.

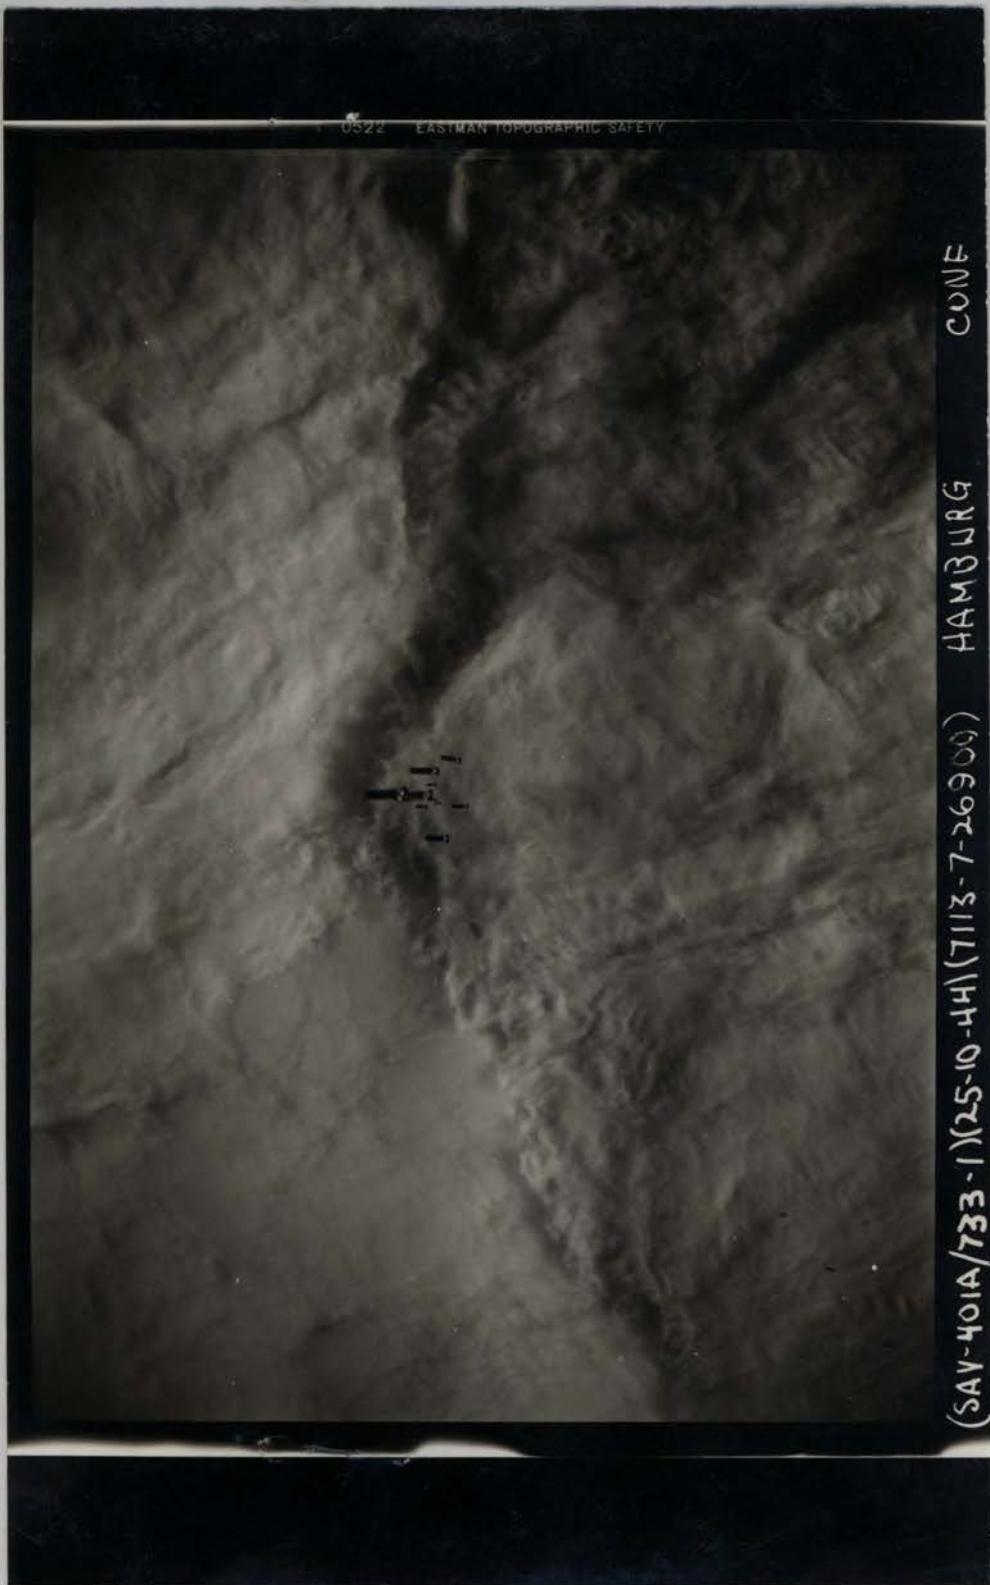

3. Sgt. Arthur J. Trojanowski, RCO, a/c 2012, reports that chaff chute in this a/c is too small to accommodate the standard sized unit. T/Sgt. Harold B. Meara, engineer, a/c 2012, wished a/c would be provided with an 8" crescent wrench, a pair of pliers and a screw driver.

4. Lt. John W. McGolrick, pilot a/c 7756, stated that the low squadron leader kept the squadron in prop wash most of the time, particularly between the IP and the target.

5. Lt. Walter L. Norton, pilot A/C 7151, reports that on several occasions his crew have had to wait at the mess hall for truck drivers to finish breakfast and have finally had to go in and get them.

6. The crews of Lt. Leland R. Mays, pilot a/c 8256, Lt. Arthur C. Jetter, pilot a/c 6132, and Lt. Charles W. Hupley, pilot a/c 7051, all request that coffee and cake be served at interrogation.

SUBJECT: Armament Malfunction Mission Report

TO : Commanding General, 1st Bombardment Division, APO 557

1. Date of Mission: 25 October 1944.
2. No gun malfunctions were reported.
3. No turret malfunctions were reported.
4. The following bombing equipment malfunctions were reported:
  - a. A/C # 43-38267 - Due to difficulty opening bomb bay doors, bombs were salvoed over target.
  - b. A/C # 44-6146 - Bombardier claimed that the intervalometer failed to function and had to salvo bombs. This A/C was checked on the ground and no malfunction was found.
  - c. A/C # 43-38159 - Five (5) bombs hung up in the left rack. Ground check revealed no malfunction.
5. There were thirty-one (31) aircraft equipped with the all-electric bomb release system participating in the mission.

SUBJECT: Crew Comments and Suggestions.

TO : Commanding Officer, Station 128, APO 667, U.S. Army. (thru  
Lt. Col. Beawell.)

1. Capt. Wallace S. Barb, co-pilot a/c 8033, reports that, although 90 per cent of chaff discharged over target dispersed effectively, 10 per cent remained in a wadded condition even though paper cover came off properly.

2. Lt. Bernhardt F. Carns, pilot a/c 7947, and Capt. Ted Carroll, pilot a/c 8033, state that the combination of a solid low undercast and quantities of chaff discharged over target effectively disrupted anti aircraft fire put up by the enemy.

3. Sgt. Arthur J. Trojanowski, RCO, a/c 2012, reports that chaff chute in this a/c is too small to accomodate the standard sized unit. T/Sgt. Harold B. Mearns, engineer, a/c 2012, wished a/c would be provided with an 8" crescent wrench, a pair of pliers and a screw driver.

4. Lt. John W. McColdrick, pilot a/c 7736, stated that the low squadron leader kept the squadron in prop wash most of the time, particularly between the IP and the target.

5. Lt. Walter L. Morton, pilot a/c 7161, reports that on several occasions his crew have had to wait at the mess hall for truck drivers to finish breakfast and have finally had to go in and get them.

6. The crews of Lt. Lelland R. Mays, pilot a/c 8236, Lt. Arthur G. Jetter, pilot a/c 6132, and Lt. Charles W. Hopley, pilot a/c 7931, all request that coffee and cake be served at interrogation.
